DIGITAL DOGS LENDS A HAND TO ARIZONA AUTISM UNITED

(SCOTTSDALE, ARIZONA – June 22, 2007) – Digital Dogs, Inc., a Scottsdale-based Internet services company announced recently that it will design and develop a new website, pro bono, for Arizona Autism United (AZA United).

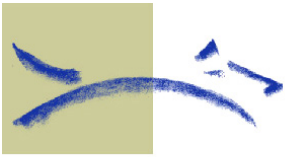

AZA United is a human services cooperative that specializes in bilingual services that support children with autism and their families. Its mission is to provide high quality, personalized care to children with autism, promoting future growth and opportunity. The group emerged in response to the community's need for eliminating language barriers to provide more specialized and in-depth services to children with autism.

“AZA United serves to unite Arizona's families of individuals with autism. We remove language barriers and design services that serve to improve quality of life for individuals with autism, while building a community resource for these families,” said Sara Wilson, AZA United marketing director. “And, thanks to Digital Dogs, AZA United will have a new website to help get our message out there to those families that need it most.”

“We are pleased to work with AZA United on this important website. Improving communication and strengthening the support through the internet will enhance the children's opportunities in life—we all share this goal,” said Richard Docter, president of Digital Dogs.
